GENERAL INFORMATION

Infection Control Practice Recommendations

This conference is a medical forum designed for health care professionals who treat or are interested in treating cystic fibrosis and cystic fibrosis patients and their caregivers.

We encourage attendees with CF to know their comfort level with infection control practices and risks and determine their attendance accordingly.

Patients who have had a positive sputum culture for *Burkholderia cepacia complex* (*B. cepacia*) **should not attend**. *B. cepacia* is contagious to individuals with CF. *B. cepacia* can be transmitted through casual contact or close proximity with infected individuals. *B. cepacia* infection can cause serious respiratory illness in CF and, in some patients, may result in rapid decline in lung function, possibly leading to death.

*B. cepacia* is not a known health risk to individuals without CF who are otherwise healthy.

To assist in minimizing the spread of germs all attendees should:

1. Frequently clean hands with soap and water or alcohol-based hand gel.
2. Cough or sneeze into a tissue, throw it away, then clean your hands.
3. Avoid spreading germs by not touching your eyes, nose or mouth. Seek medical attention if you are ill.
4. Maintain at least an arms' length (3 feet) from those with a respiratory infection.
5. Use an elbow bump as an alternative greeting.

We appreciate attendees following these practices to safeguard the health of all individuals with CF who attend this conference. For more information on infection control contact: www.cff.org/treatments/CF/CareGuidelines

CONFERENCE ATTIRE

Relaxed and comfortable clothing is encouraged. A sweater or layered clothing would add comfort when room temperatures vary.
