At Children’s Hospital, **nationally recognized pediatric orthopaedic physicians** are skilled in diagnosing and treating infants, children, teens and young adults with bone, joint and muscle conditions. Advanced training and education allows experts to bring leading solutions to the children of Mississippi. These solutions may include observation, physical therapy, braces, splints or surgery.

As **Mississippi’s only pediatric orthopaedic surgeons**, our physicians cover the full spectrum of care, including trauma, hand, spine, sports, neuromuscular problems and any type of limb deformity.

**Comprehensive Diagnostic and Treatment Services Include:**

**Limb Length Disorders**
- Congenital deformities
- Developmental deformities
- Infections and diseases

**Spine**
- Scoliosis
- Kyphosis
- Spondylolisthesis
- Pulmonary Insufficiency Syndrome
- Complex spine deformities

**Upper Extremities**
- Congenital hand deformities
- Joint contracture release
- Shoulder stabilization
- Nursemaid's elbow
- Fractures
- Bone infections

**Lower Extremities**
- Clubfoot
- Blount’s Disease
- Knee problems
- Hip dysplasia
- Fractures
- Bone infections

**Congenital Disorders**
- Cerebral Palsy
- Muscular Dystrophy
- Osteogenesis Imperfecta
- Skeletal Dysplasias
- Spina Bifida

**Advanced Program Benefits**

Our program provides a number of advantages not found anywhere else in the state. We offer Mississippi’s only practice of pediatric orthopaedic surgeons, and we are part of Mississippi’s only Children’s Hospital. We are also part of Mississippi’s only Academic Medical Center, which means our team has access to the latest research and specialists across a wide field of medicine. Our physicians collaborate with other departments, such as oncology, genetics, endocrinology and rheumatology, to provide life-changing treatments for our patients.
